Question 1: Analyze the causes and effects of the Cold War.

Sample Answer:

The Cold War was primarily caused by ideological differences between the United States and the Soviet Union, particularly capitalism versus communism. The aftermath of World War II left these superpowers vying for global influence, leading to conflicts over political and economic systems in various regions. The division of Germany and the Berlin Blockade exemplify early Cold War tensions. The arms race, including the development of nuclear weapons, escalated fears of mutual

destruction, while proxy wars in Korea and Vietnam reflected ideological struggles. The Cold War shaped international relations and security policies for decades, influencing global politics profoundly.

Question 2: Discuss the process of decolonization in Africa and its impact.

Sample Answer:

Decolonization in Africa was driven by a combination of factors, including the weakening of European colonial powers after World War II, rising nationalist movements, and international pressure for independence. Leaders like Kwame Nkrumah in Ghana and Jomo Kenyatta in Kenya mobilized populations to demand self-governance. The process often involved negotiations, protests, and sometimes violent conflicts. The impact of decolonization was significant: it led to the emergence of new nation-states, altered geopolitical alignments, and challenged existing economic structures.
