Financial Accounting: An Overview

Financial accounting primarily focuses on the preparation of financial statements—such as balance sheets, income statements, and cash flow statements—that provide an external view of an organization's financial health. These statements adhere to standardized frameworks like Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS). Their purpose is to inform stakeholders, including investors, creditors, regulators, and the public, about the company's financial position and performance over a specific period.

Key features include:

- Historical data emphasis
- Standardized reporting formats
- External stakeholder focus
- Periodic reporting (quarterly, annually)

Managerial Accounting: An Overview

In contrast, managerial accounting is internally oriented, aimed at assisting management in decision-making, planning, and control. It involves preparing detailed reports, budgets, forecasts, and performance analyses tailored to the company's internal needs. Unlike financial accounting, managerial accounting does not adhere to standardized formats and often involves real-time data processing.

Key features include:

- Forward-looking and planning focus
- Customized reports for internal use
- Emphasis on cost analysis, budgeting, and variance analysis
- Supports operational decision-making
