Understanding the Ethiopian Calendar: An Overview

The Ethiopian calendar, also known as the Ge'ez calendar, is a solar calendar that has been used for centuries in Ethiopia and Eritrea. It is closely linked to the Coptic calendar and shares many similarities with the Egyptian calendar. Its unique features, such as its calculation of the new year, month names, and year numbering, set it apart from the Gregorian calendar widely used worldwide.

Historical Origins and Development

The Ethiopian calendar traces its origins to ancient Egyptian timekeeping systems, which were adopted and adapted by early Christian communities in Ethiopia. The calendar's current form is believed to have been established during the reign of Emperor Amda Seyon I (14th century), with significant modifications over the centuries.

Key points:

- Based on the ancient Egyptian solar calendar.
- Influenced by the Coptic Orthodox tradition.
- Maintains a 13-month structure, with 12 months of 30 days and one month of 5 or 6 days

(depending on leap year).

Relation to the Coptic and Gregorian Calendars

While sharing origins with the Coptic calendar, the Ethiopian calendar has diverged in several ways:

- The Ethiopian calendar is approximately seven to eight years behind the Gregorian calendar.
- The new year in Ethiopia falls on September 11 (or September 12 in a Gregorian leap year).
- The months are named differently, often reflecting religious or historical significance.

The Structure of the Ethiopian Calendar 2014

The Ethiopian calendar 2014 corresponds to a specific period in Ethiopia's traditional year count. To understand its structure, it is essential to analyze how the year is calculated, its months, and notable features.

The Ethiopian calendar's year count begins with the Annunciation of Jesus Christ, which is traditionally believed to have occurred in 9-8 BC in the Gregorian calendar. Consequently:

- The year 2014 in the Ethiopian calendar corresponds approximately to the years 2021-2022 in the Gregorian calendar.
- The calendar is typically 7-8 years behind the Gregorian system.

For 2014, the Ethiopian calendar year corresponds roughly to:

- Gregorian Year: September 11, 2021 ? September 10, 2022
- Ethiopian Year: 2014

The Months and Their Names

The Ethiopian calendar consists of 13 months:

- 12 months of 30 days each.
- 13th month (Pagume), of 5 days in common years and 6 days in leap years.

The names of the months are as follows:

The leap year rule in Ethiopia is straightforward:
