Question What are the key differences between resulting and constructive trusts?
Answer Resulting trusts typically arise when a person provides the purchase price for property but the legal title is in another's name, implying an intention to hold for the benefit of the contributor. Constructive trusts are imposed by courts to prevent unjust enrichment, often arising in cases of breaches of

fiduciary duty or fraud, where the defendant holds property on trust for the claimant. How does the 'certainty of intention' apply in establishing a trust? Certainty of intention requires that the settlor clearly intends to create a trust rather than a gift or other legal arrangement. Courts look for explicit words or conduct that demonstrate an intention to impose a trust, and lack of clarity can result in the arrangement being treated as a gift or outright transfer. What is the 'certainty of subject matter' in trust creation? Certainty of subject matter refers to the need for clear identification of the trust property. If the property or its boundaries are not sufficiently certain, the trust may fail. For example, a trust over 'all my land' must be sufficiently specific to be enforceable. When does a resulting trust typically arise in equity? A resulting trust usually arises when an express trust fails or is incomplete, such as when a settlor transfers property but the intended trust is not fully established, or when property is purchased in someone else's name without clear intention to hold beneficially. What are the requirements for a valid express trust? A valid express trust requires three certainties: certainty of intention, certainty of subject matter, and certainty of object (beneficiaries). Additionally, it must comply with formalities if applicable and be for a lawful purpose. How do resulting and constructive trusts differ in their application? Resulting trusts are based on presumed intentions and arise automatically in specific circumstances, whereas constructive trusts are imposed by courts to rectify unjust situations, often without the settlor's explicit intention, to prevent unjust enrichment. What is the significance of 'beneficiaries' in trust law? Beneficiaries are the persons or entities for whom the trust is created. They have the right to enforce the trust and ensure the trustee manages the trust property according to the terms of the trust. Certainty of beneficiaries is crucial for the validity of an express trust. Can a trust be created verbally, and what are the limitations? Yes, some express trusts can be created orally, especially in the case of implied or resulting trusts. However, for certain types of express trusts, such as those related to land, formalities like writing are required under the Law of Property Act 1925 to be enforceable. What role does the 'trustees' duty of loyalty' play in trust practice questions? The duty of loyalty requires trustees to act in the best interests of the beneficiaries, avoid conflicts of interest, and not profit personally from their position unless authorized. This principle is central in trust law and often tested in practice questions regarding breaches and remedies.
