Key Theories and Models in Organizational Psychology

A core component of organizational psychology notes involves familiarizing with influential theories and models that explain workplace behavior.

Maslow's Hierarchy of Needs

A foundational theory in psychology, Maslow's hierarchy explains human motivation through five levels:

- Physiological needs (food, water)
- Safety needs (security, stability)
- Social needs (relationships, belonging)
- Esteem needs (respect, recognition)
- Self-actualization (personal growth, fulfillment)

In the workplace, understanding these needs helps organizations design jobs that motivate employees and meet their psychological requirements.

Herzberg's Two-Factor Theory

Herzberg identified two sets of factors affecting job satisfaction:

- Hygiene Factors: salary, company policies, working conditions
- Motivator Factors: achievement, recognition, responsibility, personal growth

According to Herzberg, addressing hygiene factors prevents dissatisfaction, while motivator factors promote satisfaction and motivation.

Vroom's Expectancy Theory

This theory suggests that motivation depends on:

- Expectancy: belief that effort leads to performance
- Instrumentality: belief that performance results in rewards
- Valence: value of the rewards

Employees are motivated when they believe their effort will lead to desirable outcomes.

McGregor's Theory X and Theory Y

These theories describe two contrasting management styles:

- Theory X: assumes employees dislike work and need supervision
- Theory Y: assumes employees are self-motivated and seek responsibility

Effective management often involves understanding these assumptions and applying appropriate leadership styles.
