In practice, this underscores the importance of modifying living environments to match the capabilities of older adults, thereby reducing risks such as falls or social isolation.

3. The Activity Theory of Aging

This theory posits that maintaining social and physical activity levels correlates with improved life satisfaction in older adults. Nursing interventions often encourage engagement in meaningful activities to promote mental and physical health.

4. Theories of Self-Care and Self-Care Deficit

Based on Orem's Self-Care Deficit Nursing Theory, this approach emphasizes empowering older adults to meet their own self-care needs, with nurses providing assistance when deficits are identified.

Application in Practice:

- Assessment of self-care capabilities.
- Developing personalized care plans promoting independence.
- Education and support to foster self-management.

Practical Approaches to Geriatric Nursing Care

Implementing theory into practice involves a multifaceted approach that encompasses assessment, intervention, education, and evaluation.
