- Set up extension or parallel ledgers if necessary, for IFRS, GAAP, or other standards.

Step 6: Set Up Currency and Exchange Rate Types

- Use transaction OB08 to define exchange rate types.
- Configure translation procedures and assign currencies to company codes.
- Establish exchange rate entries for currency translation.

Step 7: Configure Posting Keys and Document Types

- Customize posting keys to control account types, debit/credit indicators, and line item display.
- Set up document types to categorize different transaction types (e.g., invoices, payments, adjustments).

Step 8: Define Account Determination and Integrations

- Use transaction OBYC to set account determination for automatic postings from MM, SD, or other modules.
- Ensure integration points are correctly mapped so that transactions trigger appropriate G/L postings.

Step 9: Configure Parallel Accounting (if applicable)

- Set up additional ledgers or ledger groups for reporting under different accounting standards.
- Define ledger-specific settings, such as currency and fiscal year variants per ledger.
