In Kuby Immunology, each component is examined with respect to its origin, function, and interaction within immune responses.

The Innate and Adaptive Immune Responses

A central theme in immunology is the distinction and interplay between innate and adaptive immunity.

Innate Immunity

- The first line of defense
- Rapid response mechanisms
- Recognizes common pathogen-associated molecular patterns (PAMPs)
- Components include physical barriers, phagocytes, natural killer cells, and soluble factors

Kuby Immunology describes how innate immunity provides immediate but non-specific defense, laying the groundwork for subsequent adaptive responses.

Adaptive Immunity

- Develops more slowly but provides specificity
