The college has expanded its faculty, facilities, and partnerships, positioning itself as a leader in rural veterinary medicine and wildlife health.

The university's strategic focus on rural and remote veterinary education reflects Alaska's vast geography and diverse animal populations. The curriculum emphasizes not just traditional veterinary sciences but also encompasses areas such as wildlife medicine, aquaculture, and indigenous animal health practices.

Academic Programs and Curriculum

Doctor of Veterinary Medicine (DVM) Degree

The flagship program at UAF CVM is its Doctor of Veterinary Medicine (DVM) degree, designed to prepare students for diverse veterinary careers, with a special emphasis on rural, wildlife, and public health.

Key features of the DVM program include:

- Integrated Curriculum: The program combines classroom instruction with hands-on clinical training, focusing on Alaska-specific animal health issues.
- Wildlife and Fish Medicine: Students gain exposure to the health management of native wildlife, marine mammals, and fish, reflecting Alaska's rich biodiversity.

- Rural and Remote Practice Training: Emphasizing training for practice in isolated communities, including telemedicine and mobile veterinary services.
- Community Engagement: Opportunities for students to work directly with rural communities and indigenous populations.

Graduate and Research Programs

Beyond the DVM, UAF offers graduate programs in veterinary biomedical sciences, wildlife health, and related fields. These programs support research initiatives aimed at solving complex issues pertinent to Alaska's ecosystems.

Research areas include:

- Wildlife disease surveillance and management
- Arctic and subarctic veterinary medicine
- Zoonotic diseases (diseases transmissible between animals and humans)
- Aquatic animal health
- Veterinary public health

Graduate students often collaborate with government agencies, wildlife organizations, and local communities, fostering a multidisciplinary approach to veterinary challenges.

Unique Aspects of UAF's Veterinary Education

Emphasis on Alaska-Specific Challenges

UAF's curriculum and research initiatives are tailored to meet Alaska's distinctive needs. This includes:

- Arctic Veterinary Medicine: Preparing students to work in extreme cold environments, understanding permafrost impacts, and managing diseases unique to Arctic species.
- Wildlife Conservation: Training in the health management of native species like caribou, moose, bears, and marine mammals.
- Rural Outreach: Developing skills for practicing in remote villages where veterinary services are scarce, including telehealth and innovative delivery methods.

Hands-On Experience in Remote Settings

Students at UAF gain practical experience through:

- Clinical rotations in rural clinics and wildlife centers
- Field research projects in Alaska's wilderness
- Community-based veterinary service initiatives

This immersive approach ensures graduates are well-equipped to serve Alaska's diverse animal populations and communities.
