Ford launched the Windstar in 1994 as part of its strategic push into the minivan market, which was rapidly expanding in the United States. Competing against established players like the Chrysler minivans, Honda Odyssey, and Toyota Sienna, the Windstar aimed to offer a blend of American

engineering, affordability, and family-friendly features.

Manufacturing and Platform

The first-generation Windstar was built on the Ford CA6 platform, shared with the Mercury Villager (a joint venture with Nissan). Its assembly primarily took place at Ford's Oakville Assembly Plant in Ontario, Canada. The model was designed to accommodate up to seven passengers and emphasized comfort, safety, and practicality.
