Population

A population refers to a group of individuals of the same species living in a specific geographic area at a particular time. These groups are studied to understand how they grow, decline, and interact with their environment.

Population Density

Population density measures the number of individuals per unit area or volume. It provides insights into how crowded a population is and can influence resource competition, disease transmission, and reproductive rates.

Population Distribution

This term describes how individuals within a population are spaced across their habitat. Common patterns include:

- Clumped: individuals group together in patches
- Uniform: individuals are evenly spaced
