Whether you're a seasoned sailor or a casual boat owner, understanding what makes this chart a noteworthy tool can vastly improve your experience on the water.

Introduction to the Klemmer Pocket Gewässerkarte

The Klemmer Pocket Gewässerkarte series is renowned for providing high-quality, portable nautical maps designed specifically for inland waterways, lakes, and coastal regions. The Müritz and Plauer

See edition focuses on two of Mecklenburg-Vorpommern's most prominent freshwater bodies, offering detailed topographical information, navigational aids, and points of interest.

This product is characterized by its compact pocket-sized format, making it highly convenient for on-the-go use. It caters to boaters, anglers, and water sports enthusiasts who require reliable information without the bulk of traditional large charts.

Design and Portability

Compact and Durable Format

One of the standout features of the Klemmer Pocket series is its portable design. The map is printed on durable, waterproof, and tear-resistant material, often a laminated or plastic-coated paper, allowing it to withstand the rigors of outdoor use. Its small size—typically around 15x10 centimeters—fits comfortably in a pocket or boat compartment, ensuring that users can carry it effortlessly during their excursions.

The compact format doesn't sacrifice detail; instead, it condenses critical navigational information into an easily accessible form. The foldable design enables quick unfolding when needed, while the sturdy material ensures longevity, even after repeated use in wet or rough conditions.

Ease of Handling and Accessibility

Users praise the Klemmer Pocket for its user-friendly layout. The map's clear symbols, legible fonts, and logical organization make navigation intuitive. The high contrast color schemes—such as blue waters contrasted with yellow or white landmasses—aid in quick recognition of features.

Moreover, the pocket size encourages frequent referencing, reducing the risk of losing track of important navigational cues. This feature is particularly beneficial during active boating or fishing trips, where quick information access can be critical.

Coverage and Detail

Geographical Scope: Müritz and Plauer See

The product provides comprehensive coverage of the Müritz and Plauer See lakes, two of the largest inland lakes in Germany's Mecklenburg-Vorpommern region. Müritz, being the second-largest lake entirely within Germany, is renowned for its biodiversity and extensive shoreline, while Plauer See offers a more intimate setting with numerous islands and bays.

The map includes:

- Main navigational channels
- Depth contours and soundings
- Marina locations and docks
- Buoy and beacon placements
- Islands and restricted zones
- Popular points of interest like beaches, campsites, and landmarks

This detailed coverage ensures boaters can navigate confidently, avoiding hazards and finding ideal spots for anchoring or fishing.

Level of Detail and Accuracy

The Klemmer map excels in delivering precision. It employs a scale that balances coverage with detail—typically around 1:25,000—allowing users to see fine contours, underwater hazards, and subtle shoreline features.

Depth soundings are represented accurately, with consistent measurement units (meters), enabling anglers to identify suitable fishing areas and boaters to avoid shallow regions. The inclusion of navigational aids and landmarks further enhances situational awareness.
