Common Organizational Behavior Final Exam Questions and Answers

Below are some typical questions that students might encounter on an OB final exam, along with comprehensive answers.

1. What are the main theories of motivation in organizational behavior?

Answer:

The main theories of motivation in organizational behavior include:

- **Maslow's Hierarchy of Needs:** This theory suggests that individuals are motivated by a hierarchy of needs, starting with physiological needs, then safety, social needs, esteem, and self-actualization. Once lower-level needs are satisfied, individuals seek to fulfill higher-level needs.
- **Herzberg's Two-Factor Theory:** Herzberg distinguished between hygiene factors (salary, work conditions) that prevent dissatisfaction and motivators (recognition, achievement) that promote satisfaction and motivation.
- **McGregor's Theory X and Theory Y:** Theory X assumes employees are inherently lazy and need supervision, while Theory Y assumes employees are self-motivated and seek responsibility.
- **Expectancy Theory (Vroom):** Suggests that motivation depends on the expectation that effort will lead to performance and that performance will lead to desired rewards.
- **Goal-Setting Theory:** Proposes that specific and challenging goals, along with appropriate

feedback, enhance performance and motivation.

Understanding these theories helps in designing motivational strategies within organizations.

2. Explain the concept of organizational culture and its impact on employee behavior.

Answer:

Organizational culture refers to the shared values, beliefs, norms, and practices that shape how members of an organization interact and work. It acts as a social glue that binds employees together and influences their behavior.

- Shapes communication: Culture determines the preferred communication styles and openness within the organization.
- Influences change readiness: A flexible and innovative culture is more receptive to change, whereas a rigid culture resists it.
- Impacts organizational performance: A strong, aligned culture fosters teamwork, commitment, and productivity.

For example, a culture emphasizing innovation encourages employees to be creative, whereas a hierarchical culture might suppress initiative.

3. Describe the stages of team development according to Tuckman's model.

Answer:

Tuckman's model outlines five stages of team development:

- **Performing:** The team functions efficiently toward goals. Roles are clear, and members work collaboratively.
- **Adjourning (or Mourning):** The team disbands after achieving objectives, and members may experience loss or reflection.

Understanding these stages helps managers facilitate effective team development and address challenges at each phase.

4. What is emotional intelligence, and why is it important in organizational behavior?

Emotional Intelligence (EI) is the ability to recognize, understand, manage, and influence one's own emotions and the emotions of others.

Salovey and Mayer identified four components of EI: self-awareness, self-regulation, social awareness, and relationship management.

Effective managers understand the political landscape and use influence ethically to facilitate decision-making aligned with organizational goals.
