 - $PV = FV / (1 + r)^n$

Interest Calculations

Interest calculations underpin many financial decisions. The manual covers simple interest, compound interest, and continuous interest.

- **Simple Interest:** $I = P \times r \times t$
- **Compound Interest:** $FV = PV \times (1 + r/n)^{nt}$
- **Continuous Compounding:** $FV = PV \times e^{rt}$

Annuities and Perpetuities

Understanding periodic payments is vital for loans, retirement planning, and investment products.

- **Ordinary Annuity:** Payments made at the end of each period
- **Annuity Due:** Payments made at the beginning of each period
- **Perpetuities:** Infinite series of payments, with present value $PV = \text{Payment} / r$
