What is a Near Vision Eye Chart?

A near vision eye chart is a visual tool designed to assess the clarity of your vision at close

distances. Unlike standard eye charts used for distance vision testing, near vision charts feature smaller print sizes suitable for evaluating vision that is used in reading, computer work, and other close-up activities.

Near vision refers to the ability to see objects clearly at close distances, typically within 14 inches (35 centimeters) from the eyes. This visual function is crucial for daily activities such as reading, sewing, using smartphones, or working on a computer. Maintaining good near vision is vital not only for comfort and productivity but also for overall eye health. Regular assessment can help detect early signs of vision issues, prompting timely interventions such as corrective lenses, exercises, or professional eye care.
