- Build a Minimum Viable Product (MVP): Develop a simple version of your product to test your assumptions with real users.
- Iterate Based on Feedback: Use early feedback to refine and improve your offering, ensuring it truly resonates.

Validating the Market

- Market Size: Ensure your target market is large enough to support your ambitions.
- Competitive Landscape: Analyze existing competitors, identify your unique advantage.
- Customer Willingness to Pay: Confirm that your target audience values your solution enough to pay for it.

The Power of a Strong Team and Culture

Product Development
