- Keep the cut pieces organized for efficient assembly.

3. Folding and Shaping

Pre-fold all parts along designated fold lines before assembly. Use a ruler or bone folder to create sharp creases. Fold tabs inward or outward as specified in the design.

4. Assembling Structural Elements

Begin with the main walls and towers:

- Walls: Glue tabs to adjacent walls or to a baseboard.
- Towers: Assemble the cylindrical or rectangular towers separately, then attach to walls.
- Gatehouse and Drawbridge: Construct these features separately and affix to the main structure.

Use clamps or weights to hold pieces in place as glue dries. Allow sufficient drying time to ensure stability.

5. Adding Defensive Features

Enhance realism with details such as:

- Battlements or crenellations on walls and towers.
- Arrow slits or windows.
- Parapets and walkways.
- Moats or surrounding walls, if included in your design.

Use thin strips of paper or cardboard for battlements, glued carefully atop walls.

6. Painting and Finishing Touches

Once the main structure is assembled:

- Paint the castle to resemble stone, brick, or wood. Techniques like dry brushing add texture.
- Add decorative elements such as flags, banners, or shields using colored paper or printed images.
- Apply weathering effects for aged appearance?use diluted paint or chalks.
- Seal the model with a clear varnish for durability.
